

## NET.Lock – Safe Workplace Lockers

### TOUCHLESS TECHNOLOGY

No contact to contaminated surfaces. Use your locker with your existing employee access card or mobile app.

### EMPLOYEE SAFETY

Provide easy to sanitize and safe personal storage to support clean desk policies and disinfection protocols.

### SAFE LOCKER MANAGEMENT

Manage physical distancing guidelines for effective and safe employee collaboration.

## Touchless Technology

No contact to contaminated surfaces means less risk to be infected. Touchless technology ensure lockers are safe to use.

- ✓ extend your existing access system: re-use of employee cards
- ✓ smartphone ready: use your personal, safe mobile
- ✓ Hands free operation: spring opening and push-to-lock function
- ✓ no queuing at central terminal: one-on-one use directly at personal locker

"80 % of people behave differently today when interacting with public technology that they have to touch."

## Employee Safety

Employees are your most valuable asset. Strict disinfection protocols are gaining more importance and with lockers you help enable a clean desk policy to sanitize workplaces.

- ✓ Elegantly hidden locks allow smooth surfaces for easy disinfection
- ✓ Schedule regular maintenance-cleaning intervals
- ✓ Ability to Track locker maintenance in audit-trail
- ✓ Feel good: Confidence for returning employees

"People could catch COVID-19 by touching contaminated surfaces or objects. Surfaces (e.g. desks) and objects (e.g. telephones, keyboards) need to be wiped with disinfectant regularly because contamination on surfaces touched by employees and customers is one of the main ways that COVID-19 spreads"

## Safe Locker Management

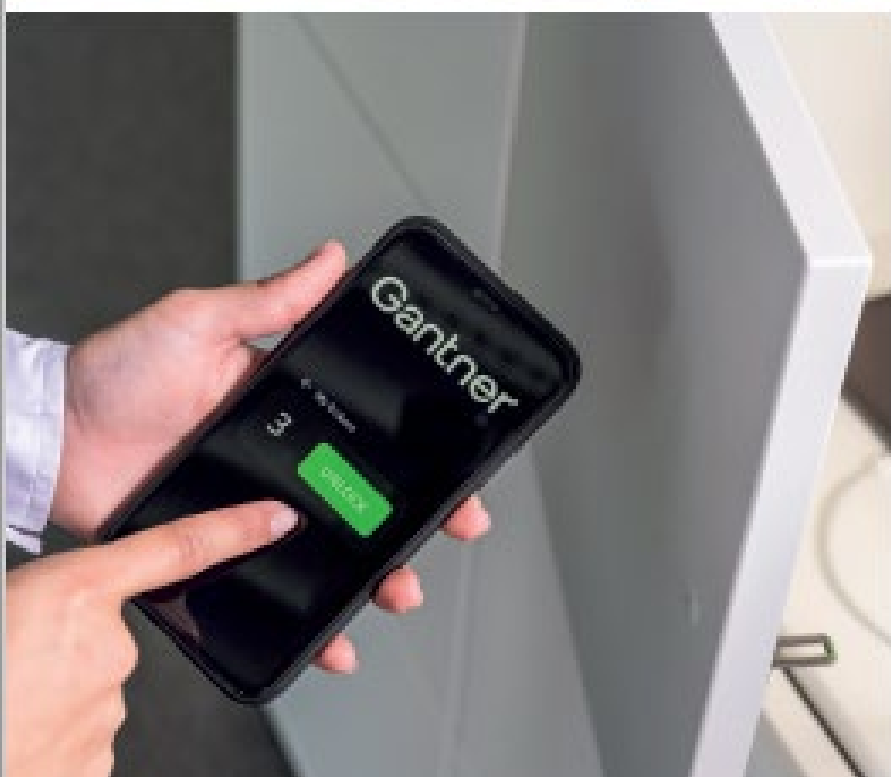

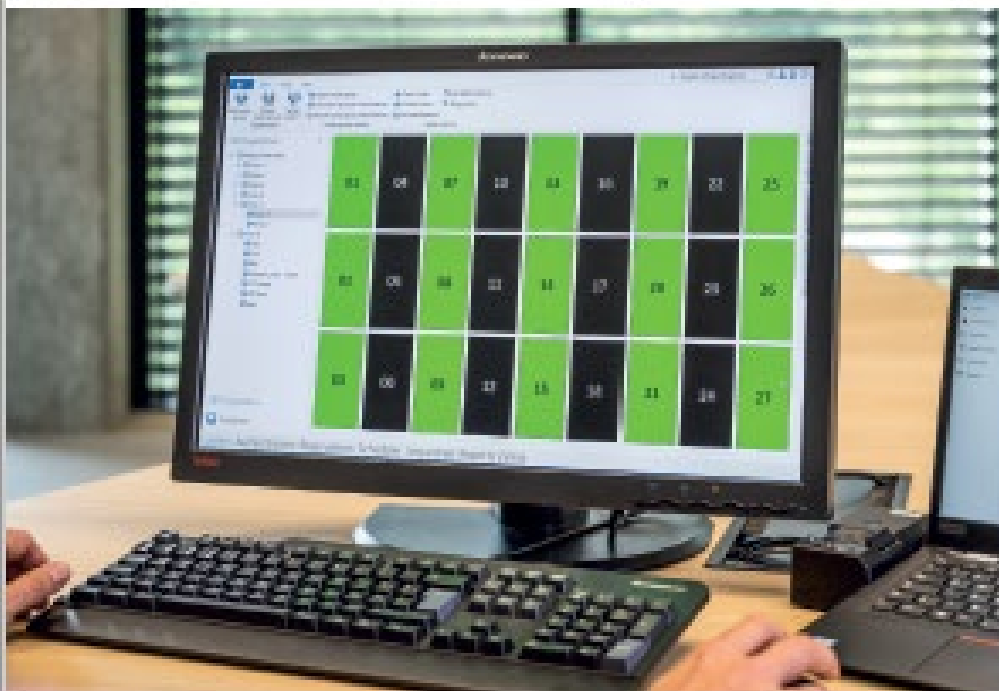

Physical distancing is key for prevention. This requires new workplace planning and changes the way we will collaborate. Actively managed lockers support this need for an effective and safe working environment.

- ✓ Encourage distancing of employees by simply deactivating certain lockers
- ✓ Easy assignment of lockers according to individual working schedules
- ✓ Control all locker functions remotely from a central location
- ✓ Manage demand by the pre-booking of day lockers
- ✓ In case of quarantine: locker utilization reports allows for contact tracing.

"To implement physical distancing in your workplace will require to re-think all elements of your daily routines. Intelligent lockers can help creating a safe working environment."
